Promotes plant growth and provides potassium that is readily available for plant use. Suitable for all plants grown in the greenhouse, landscape, garden or commercial fields. Seaweed Powder Soluble can be applied as a foliar application or through irrigation to prevent or correct potash nutrient deficiencies that could limit growth and yields. For best results, apply according to recommendations based on plant tissue or soil analysis for a given crop.

**MIXING INSTRUCTIONS:** Mix well in the desired amount of water for full coverage. Seaweed Powder Soluble is compatible with most other fertilizers and plant nutrients. When mixing with other products it is recommended that a physical compatibility test be conducted before use. A test using small quantities in proportion to field application rates is recommended.

#### DIRECTIONS FOR USE:

Apply 14 to 21 oz. of product per acre as a foliar application or 2-5 pounds per acre through drip irrigation. Only mix product needed for immediate application. Do not store diluted product.

**Lawn and Garden:** Mix 1-2 teaspoons per gallon of water. Apply as a foliar spray, soil drench, or through irrigation systems everything 2-4 weeks or as needed.

Recommended rates are intended as a guideline only and may not be suitable for all regions, conditions, and crops. Specific application rates should be determined from crop and soil analysis.

Do not apply near water, storm drains, or drainage ditches. Do not apply if heavy rain is expected. Apply only to the intended application site. Any material that lands on an impervious surface must be swept back onto the turf.
